

Precision Engineering Workforce Skills Qualifications (PE WSQ) Specialist Diploma

The PE WSQ Specialist Diploma is a joint initiative by the Singapore Institute of Manufacturing Technology (SIMTech) and the Singapore Workforce Development Agency (WDA) to provide hands-on training to equip future PE professionals in cutting-edge precision manufacturing, machining and laser processing technologies.

This programme will be conducted through a series of lectures, lab demonstrations and project attachments in selected industrial applications. It aims to equip workers in the PE industry towards higher-value manufacturing activities, as companies move their labour intensive activities out of Singapore.

Engineers, researchers, and technicians from the Precision Engineering, Electronics, Aerospace and Automotive sectors are welcome to attend. The course will benefit both users and implementers in their respective work areas.
