

# Why did IDI join the SERC AP

- IDI's business has been in other industry sectors
- SERC AP is a good platform for IDI to start working with aerospace industry
- We decided to take a risk at the beginning

# Experience with the SERC AP

- Networking with members and RIs
- Knowing the latest requirements from the aerospace industry
- Interacting with members and RI researchers made us more confident in working aerospace related applications

# Involvement in the SERC AP

- **Project:** Development of innovative, environment-friendly and efficient laser cleaning processes for aircraft components
- **Requirement:** Development of a prototype laser cleaning system
- IDI's expertise in laser system integration will contribute to the development
- Experience gained and knowledge obtained will certainly build enhanced IDI capability to serve aerospace industry in the future
